

3's Class News

Sept. 27- Oct. 1, 2021

We had a great time last week finding out that our primary colors can be mixed together to give us our secondary colors. We found out with a squish painting that red and yellow make orange. We found out with water colors that blue and yellow make green. This week we will finish our unit on the colors of the rainbow with purple and rainbows.

Please bring something purple to school on Monday and Tuesday.

Starting next week we will begin our next unit on Nighttime and Nocturnal animals. The children will need to bring in a flashlight with their name on it that they can leave at school for the whole month. They will bring them back home when we are finished with this unit.

Books: Warthog Paint by Pamela Duncan and What Makes a Rainbow? by Betty Schwartz

Snack

Monday and Tuesday- Snack mix, purple grapes and apple juice

Wednesday and Thursday- Rainbow toast, apple juice

Friday- Snack mix, apple juice

Let's work at home: Discuss with your child the primary and secondary colors.

Remind them that the secondary colors are made when you mix the primary colors together. Send your child on a scavenger hunt around the house for items in the colors.
